

FORM B

Checklist for Assessing HF Readiness

Form B scores whether the facility is ready to manage malaria: training, registers, guidelines, the pharmacy shelf, working tools, referral and waste.

Eleven sections, 53 scored points. The score is what you discuss with the In-Charge before you leave.

HOW TO USE THIS GUIDE

Each step shows the screen as it looks on your phone, with numbers on the parts that matter. The page after it explains those numbers. Every question must be answered before the form will submit to the ICF-SL server.
