

FORM G

Data Management Checklist

Form G checks the paper trail: what the registers hold, what the summary forms say, and what finally reached DHIS2 — and whether the three agree.

Twelve sections, one screen at a time. Most of it is asked and observed; section 8 is counted.

HOW TO USE THIS GUIDE

Each step shows the screen as it looks on your phone, with numbers on the parts that matter. The page after it explains those numbers. Every question must be answered before the form will submit to the ICF-SL server.

WHAT THIS GUIDE COVERS

Six steps.

1 Who you supervised

2 Data knowledge and training

3 DHIS2 access and use

4 Tools and submission status

5 The verification triangle

6 Actions, feedback, then submit

WHO YOU SUPERVISED

Section 1 ends with the staff counts for this round.

DATA ENTRY

SUMMARY

ICF-SL

NMCP

National Malaria Control Programme — Ministry of Health, Sierra Leone

MOCM/OTSS+ CHECKLIST

FORM G: OTSS/MOCM Data Management Checklist

FORM G: DATA MANAGEMENT CHECKLIST

Section 1 of 12: Facility Demographics

1. FACILITY DEMOGRAPHICS

District *

Bo

1

Chiefdom / Zone / City *

Badjia Chiefdom

2

Health Facility (PHU) *

Njagbahun (Badjia) MCHP

Health Facility Type *

MCHP

Staff supervised this round — MALE *

2

Staff supervised this round — FEMALE *

3

Next →

WHO YOU SUPERVISED

What each number on the previous page means.

1 Staff supervised — male

Count the people you actually sat with on data management, disaggregated by sex.

2 Staff supervised — female

The same. These two feed the programme's reach reporting for OTSS.

Count people, not visits

One person mentored twice in the round is one person. Section 10 counts them again per issue area, which is a different question.

WHAT THE RECORDS STAFF KNOW

Sections 2 to 4 — training, then nine knowledge checks.

Section 3 of 12: Data Knowledge

1

3. DATA KNOWLEDGE ASSESSMENT

Identify a suspected malaria case in the CR register *

☒ Yes

☐ No

Differentiate between new and old malaria cases *

☐ Yes

☒ No

Differentiate between provisional and additional diagnosis *

☐ Yes

☒ No

← Back

Next →

WHAT THE RECORDS STAFF KNOW

What each number on the previous page means.

1 Ask them to show you

Nine questions, each answered by the person in charge pointing it out in the register.

2 The two hardest

New versus old cases, and provisional versus additional diagnosis. These drive most over-counting.

3 Do they train others?

Section 4: whether the records in-charge coaches other staff on each tool.

Knowledge, not paperwork

This is a demonstration, not a quiz. “Yes” means they identified it correctly in front of you.

DHIS2 ACCESS AND USE

Section 5. Who enters, who checks, who looks.

5. DHIS2 ACCESS & USE

How does the facility usually transfer data into DHIS2?

*

☐ Enters directly into DHIS2 at the facility level

☒ Sends paper summary sheets to DHMT for entry

1

☐ Data is entered by chiefdom supervisors

When was the last time the facility head accessed DHIS2? *

☐ Less than one week ago

☐ 1 week to 1 month ago

☒ Greater than 3 months ago

2

☐ Facility head has never accessed DHIS2

How does the facility validate its data before transmitting? *

☒ Facility based data validation

☐ Sub-district data validation

3

☐ Data sent without validation

DHIS2 ACCESS AND USE

What each number on the previous page means.

1 How data reaches DHIS2

Entered at the facility, sent on paper to DHMT, or entered by chiefdom supervisors.

2 When the head last looked

A facility head who never opens DHIS2 cannot use its own data.

3 Validation before sending

Facility-level, sub-district, or sent with no validation at all.

4 How the data is used

Ask for concrete examples and write them down.

TOOLS AND SUBMISSION

Section 6: registers and monthly forms.

6 · TOOLS

6. REPORTING TOOLS AVAILABILITY

Under 5 Register (0-59 months) *

- ☐ Available with all fields completed
- ☒ Available but not fully/accurately completed
- ☐ Not Available

ITN Register *

- ☐ Available with all fields completed
- ☐ Available but not fully/accurately completed
- ☒ Not Available

TOOLS AND SUBMISSION

Section 7: submitted, and actually entered.

7 · SUBMISSION

7. DATA SUBMISSION STATUS

HF01 Morbidity submitted to DHIS2? *

☒ Yes

☐ No

REPORTS ENTERED IN DHIS2?

HF01 Morbidity *

☐ Yes

☒ No

1 Three answers, not two

Complete, available but not properly completed, or not available. The middle one is the common case.

2 Seven registers, five forms

Under 5, general morbidity, EPI, drug dispensary, mother and neonate, ITN, labour and delivery — then HF01 to HF04 and RRIV.

THE VERIFICATION TRIANGLE

Section 8. Count three sources for the same month.

8. DATA VERIFICATION TRIANGLE

Select month for audit (2 months prior) *

May 2026

1

Indicator	Register (A) 2	Summary (B)	DHIS2 (C)	Validation % 3
Fever cases (Suspected Malaria) - All ages	120	120	118	98.3%
Fever cases tested (RDT) Positive	80	80	60	75% 4
Fever cases tested (Microscopy) Positive	40	40	40	100%
Malaria treated with ACT	75	75	70	93.3%

Validation % = DHIS2 (C) ÷ Register (A). 100% means the two agree. *

THE VERIFICATION TRIANGLE

What each number on the previous page means.

1 Pick the month first

Two months before today, so DHIS2 has settled.

2 A, B, then C

A from the register, B from the summary form, C from DHIS2. Count A yourself.

3 Validation % fills itself

$C \div A$. Green near 100%, amber to 20% out, red beyond that.

4 Explain every gap

A number that does not match belongs in the action plan, with a reason.

Over 100% matters too

More in DHIS2 than in the register is not “good” — it means figures were inflated or double-entered.

ACTIONS, FEEDBACK, SUBMIT

Sections 9 and 10: issues found, staff reached.

9 · ISSUES

9. IMMEDIATE CORRECTIVE ACTIONS

Completion of Consulting room register *

☒ Yes (Issue present)

☐ No issue

DHIS2 data accuracy *

☒ Yes (Issue present)

☐ No issue

ACTIONS, FEEDBACK, SUBMIT

Section 11: your feedback and rating, then submit.

11 · FEEDBACK

11. SUPERVISOR FEEDBACK

Did you provide feedback on Data Management practices? *

☒ Yes

☐ No

Overall rating on Data Quality and Reporting *

☐ Unsatisfactory

☒ Fair

☐ Satisfactory

☐ Excellent

← Back

✓ SUBMIT FORM

1 Six areas, Yes or No

“Yes” means an issue was present — the opposite of a score.

2 Then the counts

Section 10: how many staff you reached on each of the same six areas.

FORM G IN SIX MOVES

1

Count

Staff supervised on data management, by sex.

2

Ask and watch

Nine knowledge checks in the register; who trains whom.

3

Trace the route

How data reaches DHIS2, who validates, who looks at it.

4

Check the tools

Registers and forms; submitted and entered are two questions.

5

Count three ways

Register, summary, DHIS2 — for one month, five indicators.

6

Close

Issues, staff reached, feedback, rating, submit.
